DETAILED ACTION

A new oath or declaration is required because the oath or declaration is defective. It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either an application data sheet or supplemental oath or declaration.

The wording of an oath or declaration cannot be amended. If the wording is not correct or if all of the required affirmations have not been made or if it has not been properly subscribed to, a new oath or declaration is required. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02.

Claims 1-8 and 10-11 are objected to because of the following reasons:

- a). typographical errors, such as: "pours" in step A), section 3), a); "compensate" in step A), section 3), b); and "t" in step B), all recited in claim 10. See also "pours" in claim 2. [Applicant should check the claims and specification of any typographical error(s) which maybe too numerous to mention specifically].
- b). In claims 2-8 and 11, lines 1 respectively, the dependency claims should not be capitalized. For example: Claim 1 in Claim 2, line 1, and Claim 3 in Claim 4, line 1.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/723,563

Art Unit: 1797

Claims 1-8 and 10-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a). The recitation in claim 10, last two lines of "heat transfer system to transfer heat energy produced in said reactor to said reactor to provide heat to supplement said solar heat" provides for ambiguity especially with the recitation of "produced in said reactor to said reactor".
- b). The step of "treating the condensate produced in said solar still a water treatment unit t reduce deuterium concentration recited in claim 10, step B) is vague and confusing.
- c). The claimed "said black pan positioned on the sea" in claim 2 lacks proper antecedent basis for support as it is not initially recited in the base claim. See also claim 10.
- d). The inconsistent used of terminology in the claims is improper. For example: "to produce heat" in claim 1, B), 3), as opposed to "heat energy produced" in claim 1, B), 4). See also claim 10.
- e). Claim 10 recites more features of elements in an apparatus claim rather than process steps to which the claims are directed. Active, manipulative steps should be recited, e.g., filtering, electrolyzing and etc.

Claims 1-8 and 10-11 are allowable over the prior art of record.

Art Unit: 1797

Any inquiry concerning this communication or earlier communications from the examiner should be directed to V. Manoharan whose telephone number is (571) 272-1450.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444.

The fax phone number for the organization where this application or proceeding is assigned is 571-272-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
